

## SMTA INTERNATIONAL & MD&M MINNEAPOLIS

November 3rd and 4th, 2021

fox.

Please join Essemtec at **booth #3520** to see what a printer-less future looks like for NPI, prototyping, and small batch/quick turn production for the SMT world. With Essemtec's multiple award-winning Archerfish jet print solution, 0.4mm fine pitch is now readily achievable eliminating the need for stencils and printers.

On display and available for demonstrations will be the advanced Essemtec Fox 2 multi-function system featuring solder paste jet dispensing and advance placement technologies.

## INVOLVED IN MEDICAL APPLICATIONS?

Essemtec's advanced dispensing technology is being employed by major medical manufactures throughout the world in a wide range of mediums and dispensing types. From silicones to solder, hot melt wax to adhesives, implantables to wearables, Essemtec may have the solution to your application requirements. Plus, all systems are available clean room compliant.

Please stop by our **booth #3520** or contact us at: [sales-usa@essemtec.com](mailto:sales-usa@essemtec.com)

## COME SEE THE FUTURE OF SOLDER PASTE JET PRINTING
